WORK & RESEARCH EXPERIENCE

Wisdometrics (Freelance)   Montrouge, France

Data Scientist / Consultant   **01/2024 - present**
Engage in freelance projects with small to mid-sized companies across Europe, acting as an independent consultant. Collaborate with internal teams on projects related to econometrics, causal inference, and machine learning. Develop data pipelines, create interactive dashboards, and produce reports.

etiLab Mines Paris - PSL   Paris, France

Data Coordinator (part-time)   **09/2024 - present**
Manage the data infrastructure to provide user-friendly accessible datasets for etilab researchers. Write documentation, organize code reviews, and support the onboarding of new interns and research assistants. Coordinate and contribute to research projects under the direct supervision of the PI.

Research Assistant (part-time)   **05/2023 - present**
Collaborated with a team of researchers by cleaning data, generating descriptive statistics, creating data visualizations, and developing machine learning and econometric models. Contributed to several reports and papers on topics related to labor, industrial organization, urban economics, and trade.

Data Intern   **06/2022 - 08/2022**
Assisted in public data collection building a database of French mid-sized companies, developed and deployed an interactive web application for data visualization.

Telecom-Paris - IP Paris   Palaiseau, France

Research Intern   **06/2024 - 09/2024**
Engaged in research about the deployment of fiber networks in France and its effects on firms. Estimated causal effects of fiber deployments on employment characteristics within establishments.

Narodowy Bank Polski (Polish Central Bank)   Warsaw, Poland

Research Intern   **08/2022 - 08/2022**
Prepared a literature review on the monetary/fiscal policy-mix during the great inflation. Worked on a VAR model explaining the increases in delivery time without price hikes in some sectors.
